CRMarchaeo

An Extension of CRMbase to support the archaeological excavation process

Status 21.03.2024

C-E Ore

CRMarchaeo

- Status last SIG:
  - major consolidation with version 7.1 finished in version 2.0 (approved), declaration of new official version pending.

CRMarchaeo 2.1

- Closer examination of the 2.0 document revealed that the following where incomplete:
  - Class and Property hierarchies
    - 1.2.1 CRMarchaeo class hierarchy, aligned with portions from the CRMsci and the CRMbase class hierarchies
    - List of external classes used in CRMarcheo
    - 1.2.2 CRMarchaeo property hierarchy, aligned with portions from the CRMsci and the CRMbase property hierarchies
    - List of external properties used in CRMarchaeo
  - Done
- Literature references proofread, corrected and completed
- The text of the examples has been checked and amended

CRMarchaeo 2.1

- Literature references proofread, corrected and completed
- The text of the examples has been checked and amended
- The standard formatting for all CRM-ontologies checked and added
- Hyperlinks (cross references) added

- Correct the errors (deficiencies) detected by Elias (21.03.2024), then the document should be complete and in a good shape.
